# Columbia County Summary Measure Profile: Archival Data

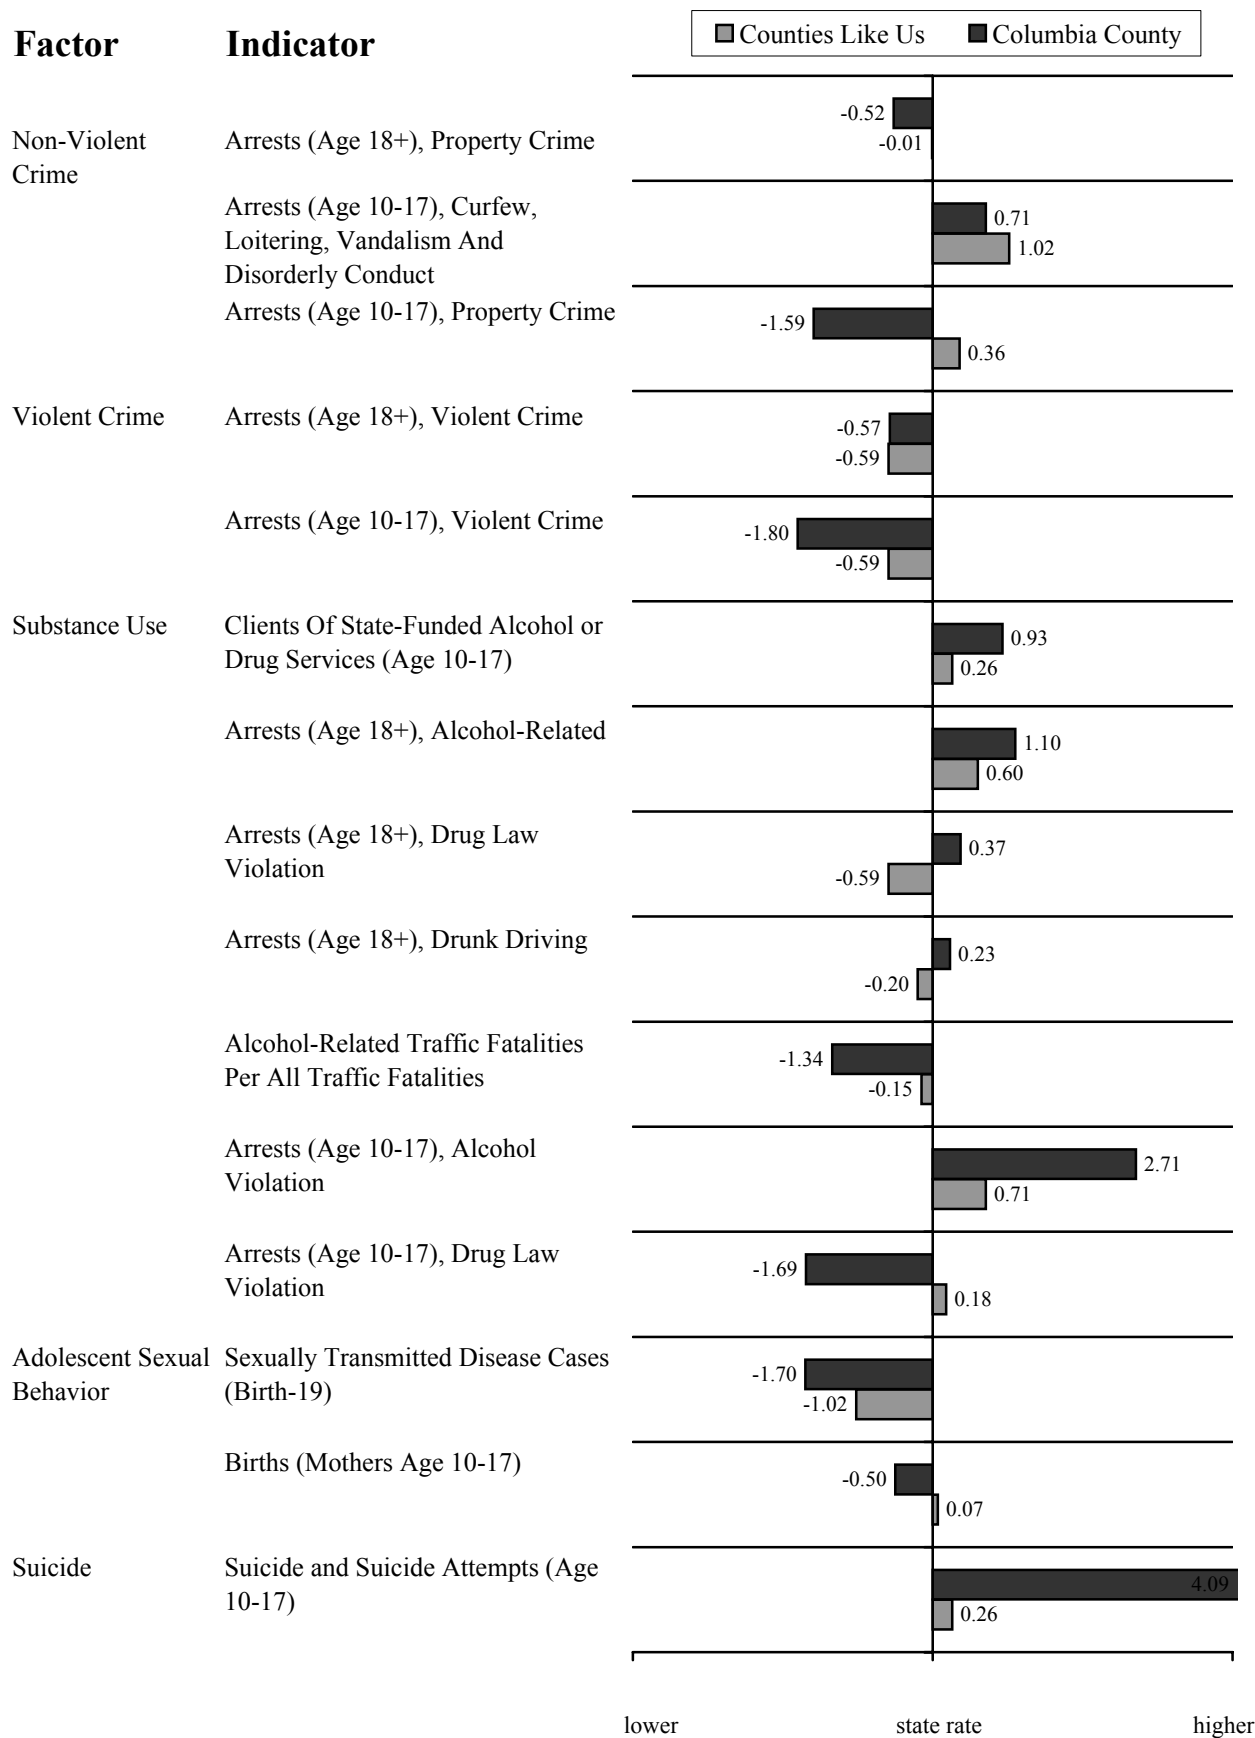

## Columbia County Indicator Profile: Archival Data

## Columbia County Indicator Profile: Archival Data

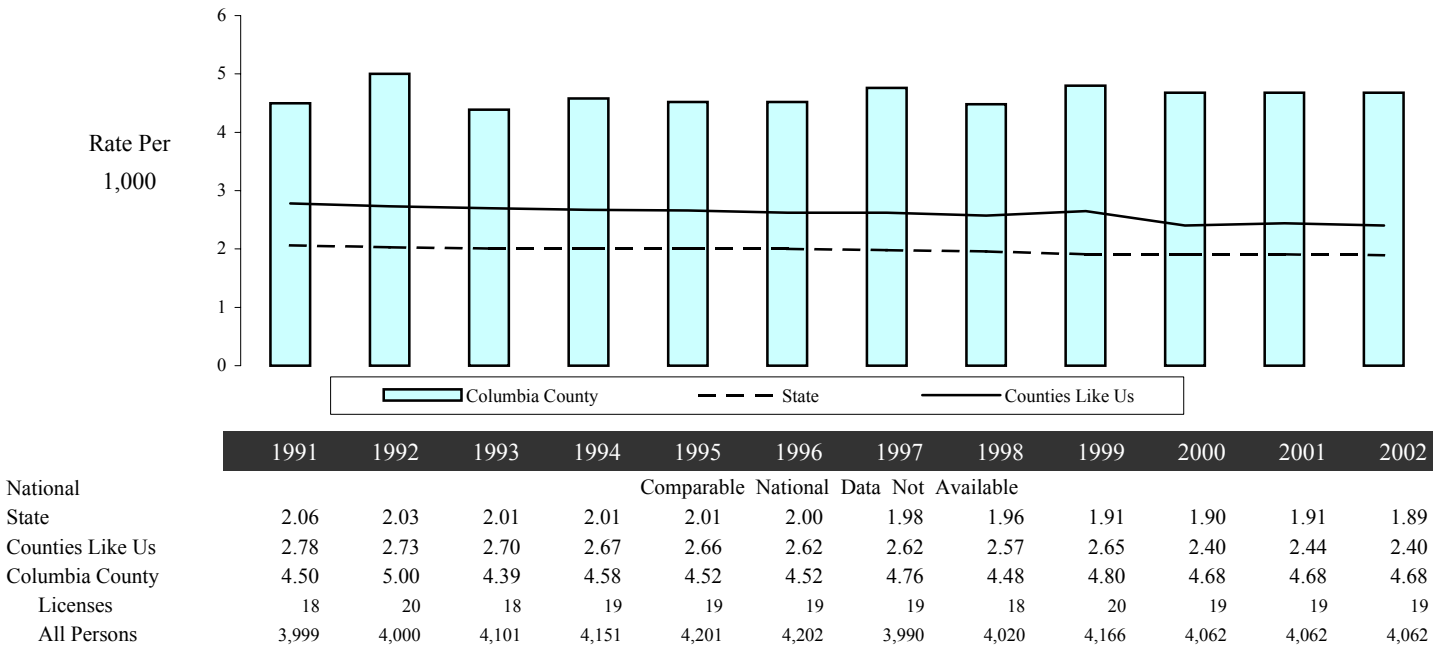

## Columbia County Indicator Profile: Archival Data

## Factor: Availability of Drugs

### Alcohol Retail Licenses

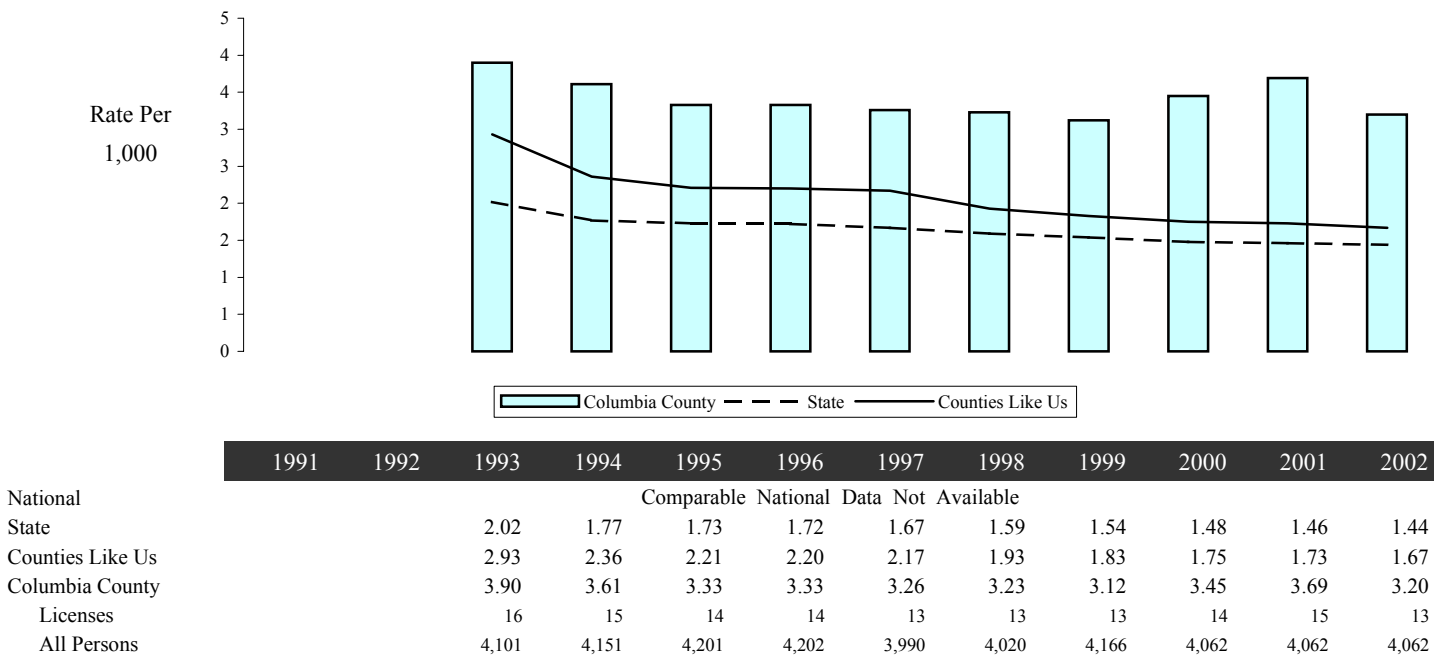

**Note:** The State and County rate are the annual number of alcohol retail licenses active during the year, per 1,000 persons (all ages). Retail licenses include restaurants, grocery stores, and wine shops but do not include state liquor stores and agencies. Retail alcohol facilities on military bases and reservations are not licensed by the State and therefore are not included in these data. Policies on licensing distributors, taxing the proceeds, and determining who can sell alcohol varies substantially from state to state. Consequently, there is no consistent comparable source for national data.

**State Source:** Washington State Liquor Control Board, Annual Operations Report

## Factor: Availability of Drugs

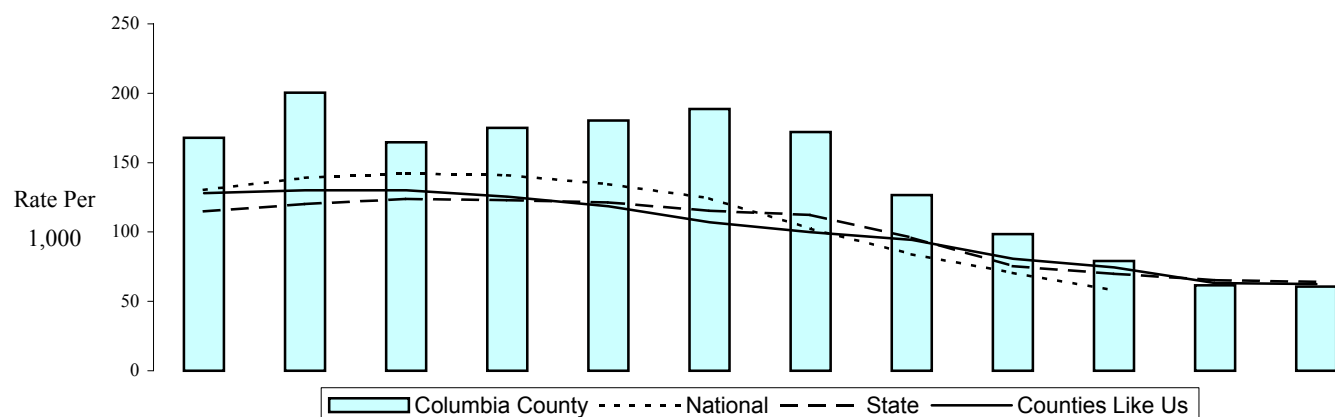

### Tobacco Retail And Vending Machine Licenses

**Note:** The State and County rate are the annual number of tobacco retailer and vending machine licenses active during the year, per 1,000 persons (all ages). Tobacco retailers on military bases and reservations are not licensed by the State and therefore are not included in these data. Tobacco sales licenses include tobacco retailer licenses (stores that sell tobacco products) and tobacco vending machines. November counts are selected as representative of the average yearly number of retailers. No source of comparable national data was obtained.

**State Source:** Department of Health (from the Department of Licensing), Tobacco Prevention Program, Tobacco Statistics

## Temporary Assistance to Needy Families (TANF), Child Recipients

	1991	1992	1993	1994	1995	1996	1997	1998	1999	2000	2001	2002
National	130.34	139.05	142.06	140.94	134.47	124.41	102.50	83.91	70.63	57.95

**Note:** The State and County rates are the number of children (age birth-17) participating in Aid to Families (AFDC/TANF) programs in the month of April, per 1,000 children (age birth-17). April was selected as the month with an average number of recipients. Nationally, prior to 1997 AFDC Flash Report was used which counts children 0-17. However National TANF child recipients are defined as children 0-19 with almost no children of age 19, therefore national denominators after 1996 are for children 0-18.

**State Source:** Department of Social and Health Services, Research and Data Analysis, Automated Client Eligibility System and Warrant Roll

**National Source:** U.S. Department of Health & Human Services, Administration for Children and Families, Office of Planning Research and Evaluation: Characteristics and Financial Circumstances of TANF Recipients Table I-29

## Factor: Extreme Economic and Social Deprivation

### Food Stamp Recipients (All Ages)

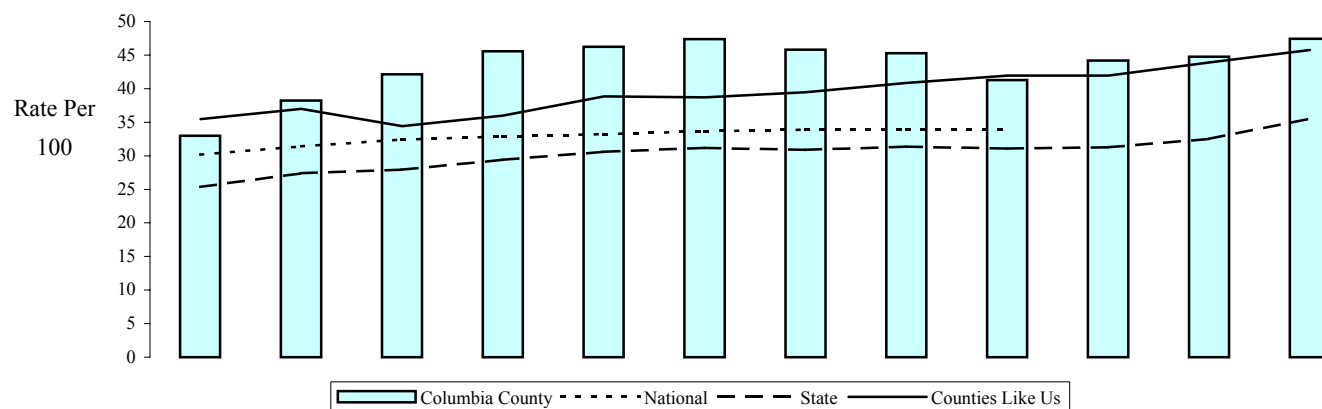

**Note:** The State and County rates are the number of persons (all ages) receiving food stamps in the month of April, per 1,000 persons (all ages). April was selected as the month with an average number of recipients. National rates use counts of all yearly recipients.

**State Source:** Department of Social and Health Services, Research and Data Analysis, Automated Client Eligibility System and Warrant Roll

**National Source:** US Census Bureau, Statistical Abstract of the US; Federal Food Stamp Programs by State

## Factor: Extreme Economic and Social Deprivation

### Free And Reduced Lunch (Students Approved)

Students, K-12	776	821	819	869	859	846	801	764	729	697	666	660

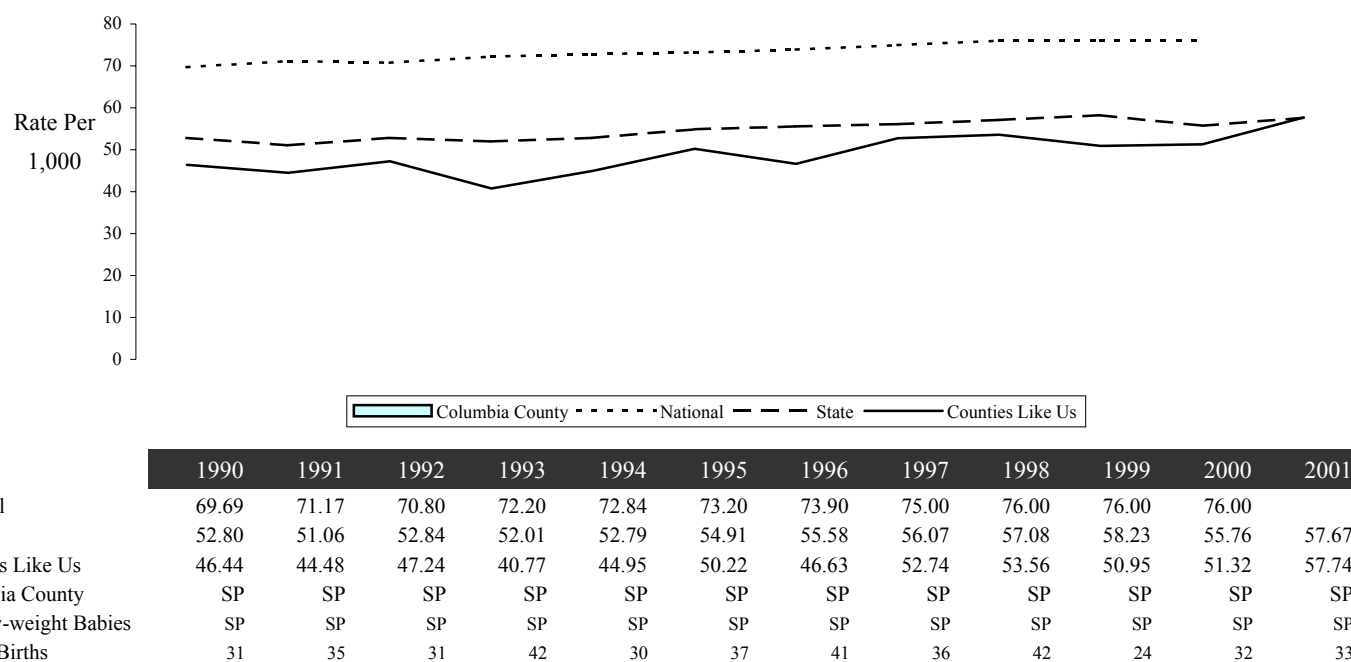

**Note:** The State and County rates are the annual number of students in public schools (K-12) whose applications have been approved for free and reduced price lunch programs, per 100 students enrolled in public schools (K-12). Children are eligible for free lunches if their family income is at or below 130% of the federal poverty level or for reduced price lunches if their family income is at or below 185% of the federal poverty level. The National rate is all students (K-12) served in free or reduced price lunch programs.

**State Source:** Office of Superintendent of Public Instruction, Child Nutrition, Free and Reduced Price Lunch

**National Source:** U. S. Department of Agriculture, Food, Nutrition, & Consumer Service, Food & Consumer Service, National School Lunch Program

## Factor: Extreme Economic and Social Deprivation

### Low Birthweight Babies

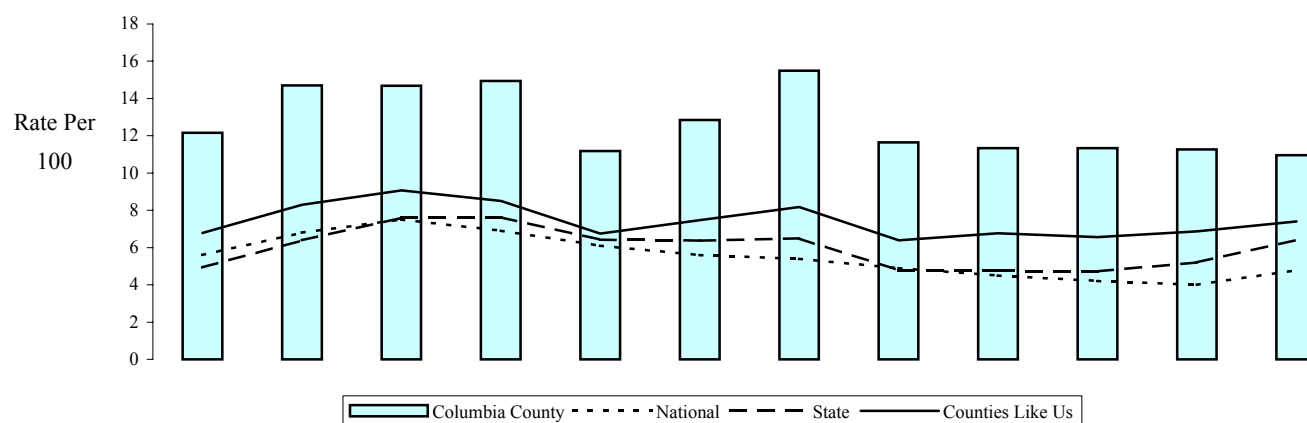

**Note:** The rate is the annual number of babies born with low birthweight, per 1,000 live births. Low birthweight is less than 2,500 grams. Rate changes in data result from on-going updates to birth records. No rate is given when the numerator is less than 5 or the number of live births is less than 100 in the geographic area.

**State Source:** Department of Health, Center for Health Statistics, Birth Certificate Data File

**National Source:** U.S. Department of Health and Human Services, Centers for Disease Control and Health Statistics National Center for Health Statistics, Division of Health Services, WONDER Data System

## Factor: Extreme Economic and Social Deprivation

### Unemployed Persons (Age 16+)

	1990	1991	1992	1993	1994	1995	1996	1997	1998	1999	2000	2001
National	5.60	6.80	7.50	6.90	6.10	5.60	5.40	4.90	4.50	4.20	4.00	4.80
State	4.93	6.39	7.59	7.63	6.42	6.37	6.50	4.77	4.75	4.72	5.21	6.40

Columbia County	12.16	14.71	14.69	14.94	11.18	12.84	15.49	11.64	11.33	11.33	11.26	10.95
Unemployed, 16+	180	200	210	230	170	190	220	170	170	170	170	150
Labor Force, 16+	1,480	1,360	1,430	1,540	1,520	1,480	1,420	1,460	1,500	1,500	1,510	1,370

**Note:** The rate is unemployed persons (age 16 and over) per 100 persons in the civilian labor force. Unemployed persons are individuals who are currently available for work have actively looked for work, and do not have a job. The civilian labor force includes persons who are working or looking for work. The monthly numbers are a snapshot in time done approximately the 12th of each month. A yearly estimate is then produced by averaging the monthly numbers. Historical data has been updated. 2002 data should be considered preliminary.

**State Source:** Employment Security Department, Labor Market and Economic Analysis, County Unemployment File

**National Source:** U.S. Department of Labor Bureau of Labor Statistics Labor Force Statistics from the Current Population Survey

## Population Not Registered to Vote

	1991	1992	1993	1994	1995	1996	1997	1998	1999	2000	2001	2002

**Note:** The rate is the annual number of persons registered to vote in the November elections but not voting, per 100 adults (age 18 and over) registered to vote. As part of the November Current Population Survey (the Voting and Registration Supplement), the Bureau of the Census collects data on voting and registration in years with presidential or congressional elections (i.e. every other year).

**State Source:** Office of the Secretary of State, Elections Division, Registered Voters

**National Source:** Calculated using data from U.S. Census Bureau, Statistical Abstract of the United States; "Voting-Age Population, Percent Reporting Registered, and Voted: 1980 to 2000"

**Prisoners in State Correctional Systems (Age 18+)**

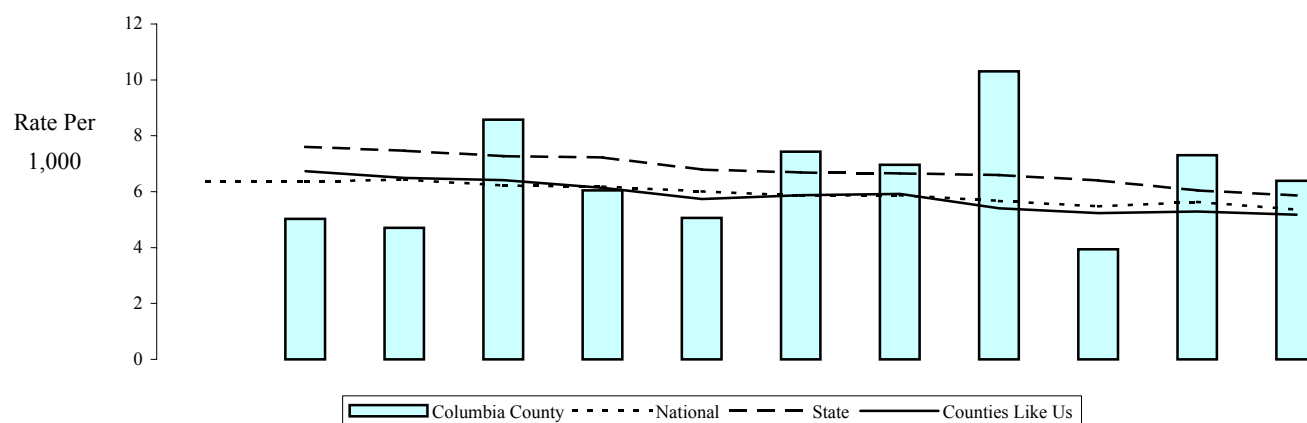

**Note:** The rate is the annual number of adult (age 18 and over) admissions to prison, per 100,000 persons (all ages). Admissions include new admissions, re-admissions, community custody inmate violations, and parole violations. Counts of admissions are duplicated so that individuals admitted to prison more than once in a year are counted each time they are admitted. The admissions are attributed to the county where the conviction occurred. No rate is given when the numerator is less than 5. National data after 1998 are not available in an equivalent form.

**State Source:** Department of Corrections, Inmates File

**National Source:** Bureau of Justice Statistics Correctional Populations in the U.S.

## Factor: Family Conflict

### Divorce

	1990	1991	1992	1993	1994	1995	1996	1997	1998	1999	2000	2001
National	6.38	6.35	6.43	6.22	6.18	6.01	5.86	5.87	5.67	5.47	5.63	5.36
State		7.60	7.47	7.27	7.22	6.79	6.69	6.65	6.60	6.40	6.05	5.86
Counties Like Us		6.73	6.49	6.41	6.14	5.74	5.87	5.92	5.41	5.23	5.29	5.17
Columbia County		5.03	4.71	8.58	6.05	5.06	7.43	6.96	10.30	3.94	7.30	6.39
Divorces		16	15	28	20	17	25	22	33	13	24	21
Persons, 15+		3,183	3,183	3,263	3,308	3,360	3,367	3,162	3,205	3,300	3,286	3,286

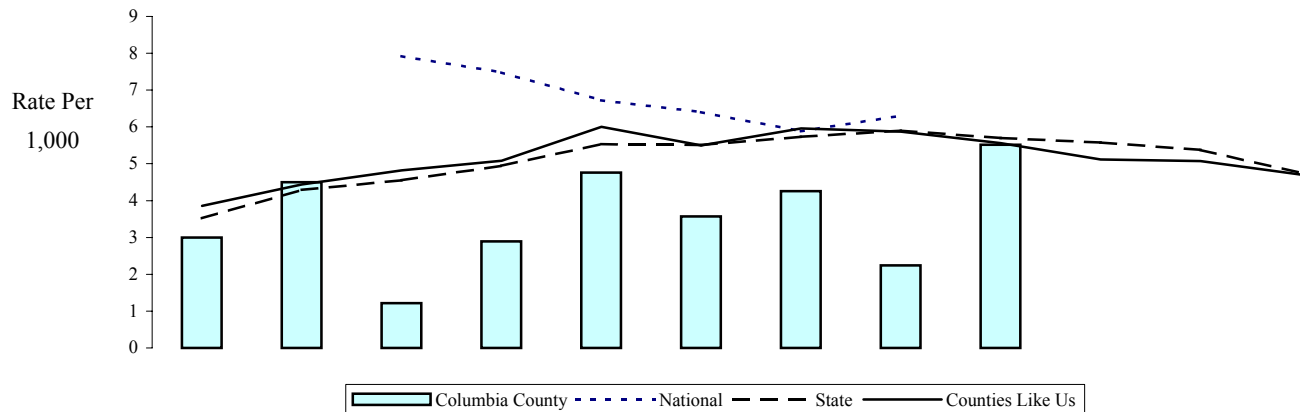

**Note:** The State and County rates are the annual number of divorces per 1,000 persons (age 15 and over). Divorce includes dissolutions, annulments, and unknown decree types; it does not include legal separations. Divorce data is reported by the woman's residence, if in Washington at the time of decree. If the woman lived outside Washington, the man's residence was used. If both parties residence was unknown the event is not assigned to a county, but is included in the state rate. The National rate is based on age 18 and over population.

**State Source:** Department of Health, Center for Health Statistics, Dissolution and Annulment Data

**National Source:** Calculated using Department of Health and Human Services, Centers for Disease Control and Prevention, National Center for Health Statistics, National Vital Statistics System, National Vital Statistics Reports Births, Marriages, Divorces, and Deaths, Provisional Data for August 2001

## Factor: Family Conflict

### Arrests, Domestic Violence

	1991	1992	1993	1994	1995	1996	1997	1998	1999	2000	2001	2002
National			7.92	7.48	6.72	6.40	5.88	6.31				
State	3.52	4.29	4.55	4.94	5.53	5.51	5.73	5.90	5.70	5.58	5.38	4.75
Counties Like Us	3.86	4.44	4.82	5.08	6.00	5.50	5.96	5.87	5.56	5.12	5.07	4.71
Columbia County	3.00	4.50	1.22	2.89	4.76	3.57	4.26	2.24	5.52	NR	NR	NR
Arrests	12	18	5	12	20	15	17	9	23	2	1	2
Persons	3,999	4,000	4,101	4,151	4,201	4,202	3,990	4,020	4,166	4,062	4,062	4,062

**Note:** The rates are the annual number of domestic violence-related arrests, per 1,000 persons. Domestic violence includes any violence of one family member against another family member. Family can include spouses, former spouses, parents who have children in common regardless of marital status, adults who live in the same household, as well as parents and their children. Multiple offences are often included in a single arrest. Preliminary data from 1995-1998 has been finalized, 1999-2002 data should be viewed as preliminary.

**State Source:** Washington State Patrol, Identification and Criminal History Section, Domestic Violence-Related Arrests File

**National Source:** U.S. Census Bureau, Statistical Abstract of the United States; Violence by Intimate Partners

## Offences, Domestic Violence

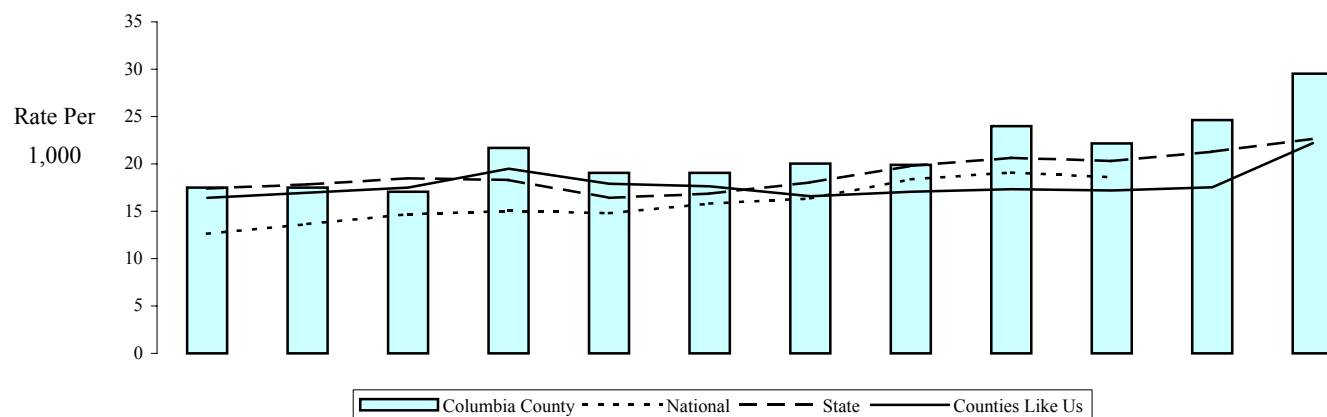

**Note:** The rates are the annual number of domestic violence-related offences, per 1,000 persons. Domestic violence includes any violence of one family member against another family member. Family can include spouses, former spouses, parents who have children in common regardless of marital status, adults who live in the same household, as well as parents and their children.

Offences differ from arrests. While funding and grants are associated with participation, reporting is not mandatory. Offences are incidence reporting. When more than one victim is involved an offence is filed for each victim. Multiple property violations performed at the same incident are counted as one offence. However when both types of events happen, only the victim incidents are reported as offences. Offences focus on the nature of the crime, while arrests focus on the apprehended accused perpetrator. Many offences occur without arresting perpetrators.

Denominators are adjusted by subtracting the population of police agencies that did not report offences. In spite of this population adjustment, when the non-reporting police jurisdiction is where much of the crime occurs, the rate for the county will be lower than it would be if that jurisdiction was included. For percent subtracted and the agencies not reporting, see the appendix on Non-Reporting Agencies and Population. No rate is given when the numerator is less than 5.

**State Source:** Washington Association of Sheriffs and Police Chiefs, UCR Division

## Existing Home Sales

	1991	1992	1993	1994	1995	1996	1997	1998	1999	2000	2001	2002

**Note:** The rates are the annual number of previously-owned homes sold, per 1,000 persons (all ages). Previously-owned homes sold is rounded to the tens. Existing homes sold are estimated based on data from multiple listing services, firms that monitor deeds, and local Realtors associations.

**State Source:** Washington Center for Real Estate Research, Washington State University, Washington State's Housing Market: A Supply/Demand Assessment

**National Source:** US Census Bureau, Statistical Abstract of the US; Existing One-family houses sold

## Net Migration, 3 Year Moving Average

	1990	1991	1992	1993	1994	1995	1996	1997	1998	1999	2000	2001
National	Comparable National Data Not Available											
State	19.51	19.16	17.83	14.09	13.32	11.67	11.52	10.19	8.97	6.89	6.50	5.76
Counties Like Us	9.85	14.48	19.27	21.53	20.71	18.58	13.74	10.83	7.06	1.71	0.05	1.37
Columbia County	9.44	13.00	36.25	21.21	41.44	25.95	11.42	17.79	40.30	33.13	25.11	5.42
New Residents	38	52	145	87	172	109	48	-71	-162	-138	-102	-22
All Persons	4,024	3,999	4,000	4,101	4,151	4,201	4,202	3,990	4,020	4,166	4,062	4,062

**Note:** Net migration is the annual number of new residents that moved into an area minus the number of residents that moved out of an area. Calculating a 3-year moving average smooths net migration. Annual net migration estimates are summed for 3-year ranges then averaged to calculate the numerator. The **last year** of the 3 years used in the average is used for the population denominator and the year label for the average net migration value.

**State Source:** Office of Financial Management, Net Migration Data

## Factor: Transitions and Mobility

### New Residence Construction

**National Source:** Office of Applied Studies, Substance Abuse and Mental Health Services Administration, Treatment Episode Data Set (TEDS)

## Factor: Family History of Substance Abuse

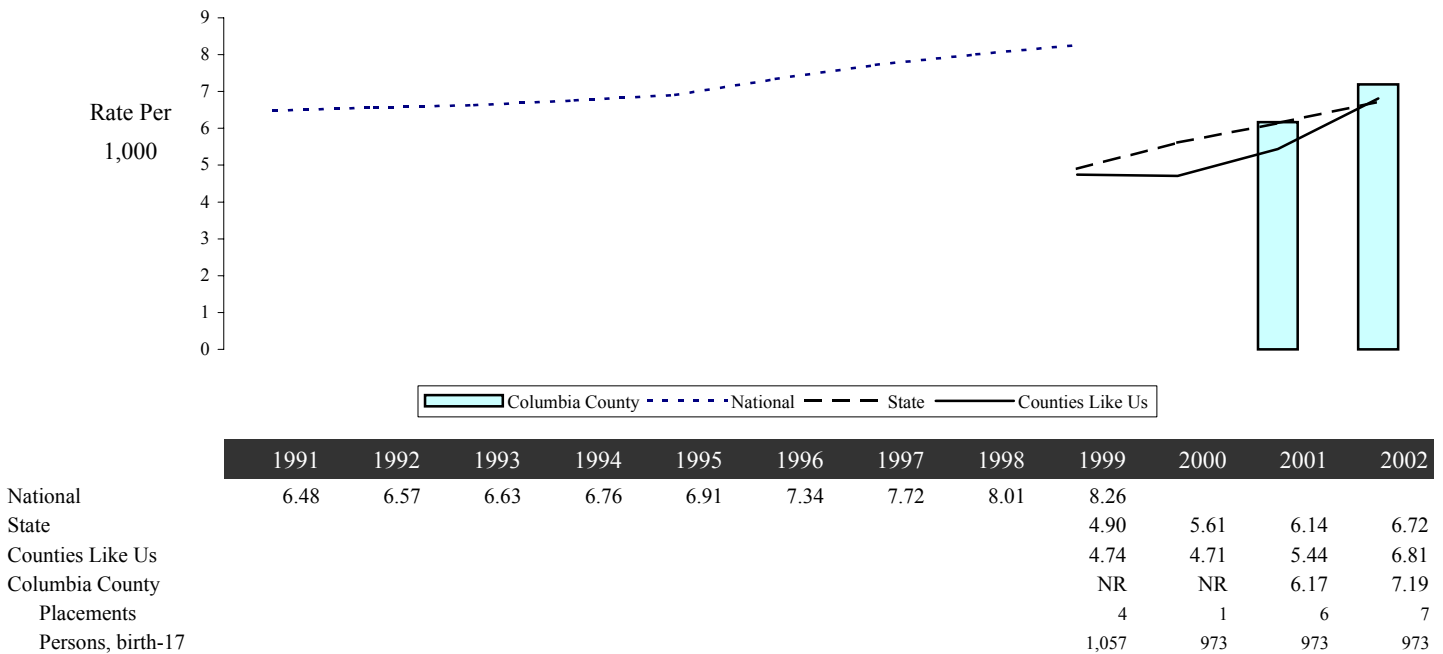

### Alcohol- Or Drug-Related Deaths

**Note:** The rates are the annual number of deaths, with alcohol- or drug-related deaths, per 100 deaths. Evaluation is based on underlying cause of death for direct and indirect associations with alcohol and drug abuse. For a complete explanation of the codes and methods used please see Technical Notes: Counting Alcohol- or Drug-related Deaths. Rates are not calculated for numerators less than 5.

**State Source:** Department of Health, Center for Health Statistics, Death Certificate Data File

**National Source:** U.S. Department of Health and Human Services, Centers for Disease Control and Health Statistics National Center for Health Statistics, Division of Health Services, WONDER Data System

**Foster Care On-going Placements, Duplicated Child Counts (Birth-17)**

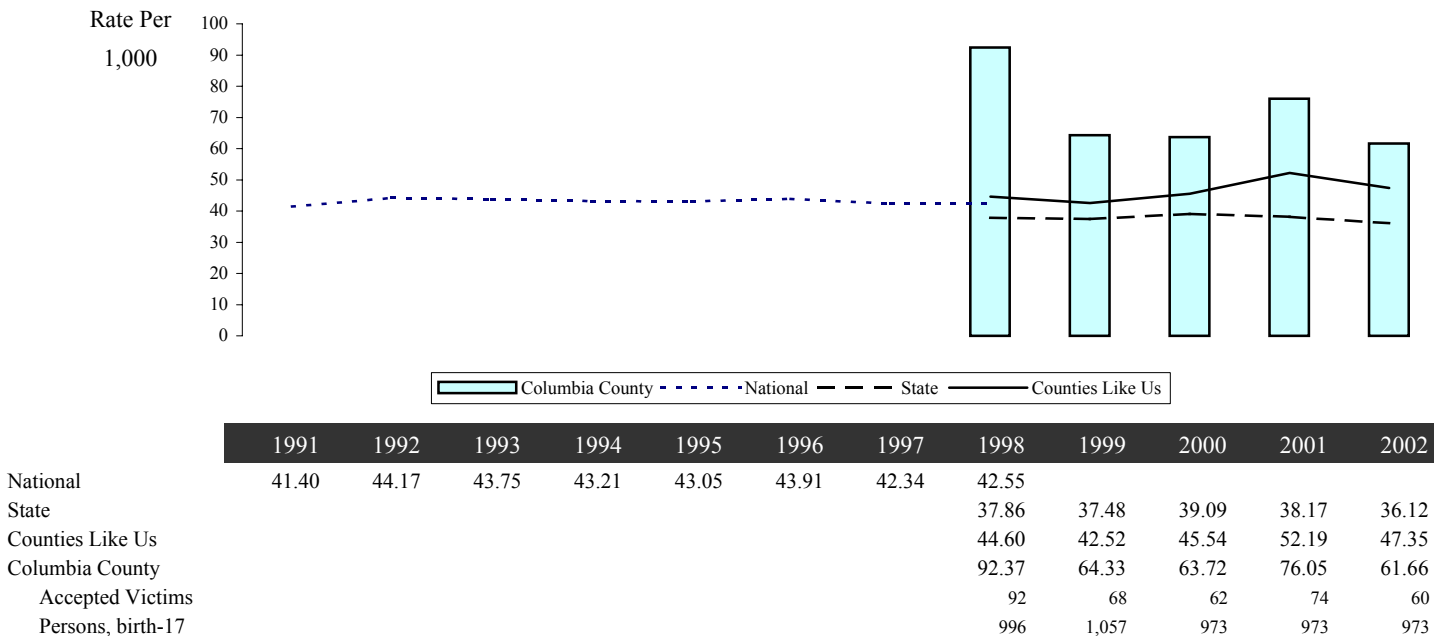

**Note:** The annual foster care client counts of on-going placements by zipcode of the care provider come from the Social Service Payment System (SSPS) represented by SSPS service codes 3210 and 3211. Group and Receiving Care placements are not included. These placements are reported to CORE-GIS through the Client Services Database (CSDB). The child counts are duplicated, since children using more than one placement are counted in each placement they use during a year. This annual method shows greater numbers of placements when compared to our previous measure, average monthly foster care. These data are collected for Washington state fiscal years (e.g., July 2000 through June 2001), and reported under the second year (e.g. under 2001 for data collected between July 2000 and June 2001).

**State Source:** Social Service Payment System (SSPS) through Client Services Database (CSDB)

**National Source:** US Department of Health and Human Services Administration for Children and Families, Voluntary Cooperative Information System (VCIS), and estimates from Adoption, Foster Care Analysis Reporting System (AFCARS)

## Factor: Family Management Problems

### Victims Of Child Abuse And Neglect In Accepted Referrals

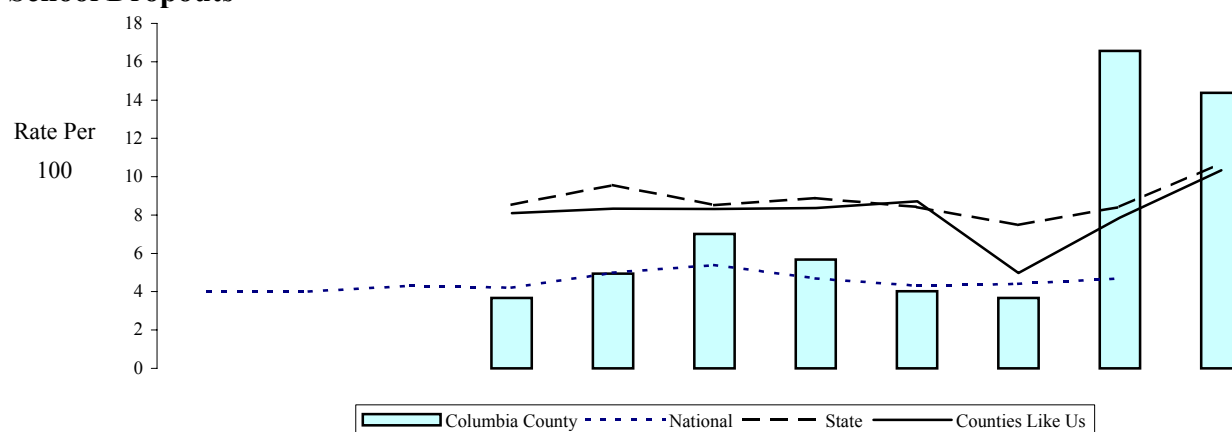

**Note:** The rates are the annual number of children (age birth-17) identified as victims in reports to Child Protective Services that were accepted for further action, per 1,000 children (age birth-17). Children are counted more than once if they are reported as a victim more than once during the year. A "referral" is a report of suspected child abuse. Child counts are now taken directly from Children's Administration, Administrative Services, Case Management Information System (CAMIS) rather than from CAMIS through Kid's Count as done in previous reports. Numbers may differ due to corrections or changes in location definition made in the database extraction process. Child location is derived from the residence at the time of referral.

**State Source:** Department of Social and Health Services, Children's Administration, Administrative Services, Case Management Information System (CAMIS)

**National Source:** US Department of Health and Human Services, National Center on Child Abuse and Neglect, National Child

## Factor: Low Commitment to School

### High School Dropouts

	1990	1991	1992	1993	1994	1995	1996	1997	1998	1999	2000	2001

Students, 9th-12th				245	283	314	317	298	272	151	306	

**Note:** The rates are the annual number of students (grades 9-12) who dropped out of school in a single year without completing high school, per 100 students (grades 9-12) enrolled in school in October. No data are available for 1992.

**State Source:** Office of Superintendent of Public Instruction, Information Services, School Dropout Files

**National Source:** U.S. Census Bureau, Statistical Abstract of the United States, High School Dropouts, Event Dropouts

**Poor Academic Performance, Grade 3 Comprehensive Tests of Basic Skills (Battery)**

**Note:** The State and County rates are the annual number of third graders whose Battery test score was below the threshold score for the low quartile of the national norm group, per 100 third graders who took the Battery test. The Battery test score is the average of the scores on the reading, language, and math portions of the Comprehensive Tests of Basic Skills. The Iowa Tests of Basic Skills (ITBS) at third and sixth grades, and the Iowa Tests of Educational Development (ITED) at ninth grade, comprise the norm-referenced component of the statewide testing program.

**State Source:** Office of Superintendent of Public Instruction, Instructional Programs(OSPI), Curriculum and Assessment, Grade 3 Low Quartile Test File

**National Source:** By definition the national low quartile is 25%. The exact score representing that quartile boundary is used by OSPI to calculate the number of students testing below that score in Washington State.

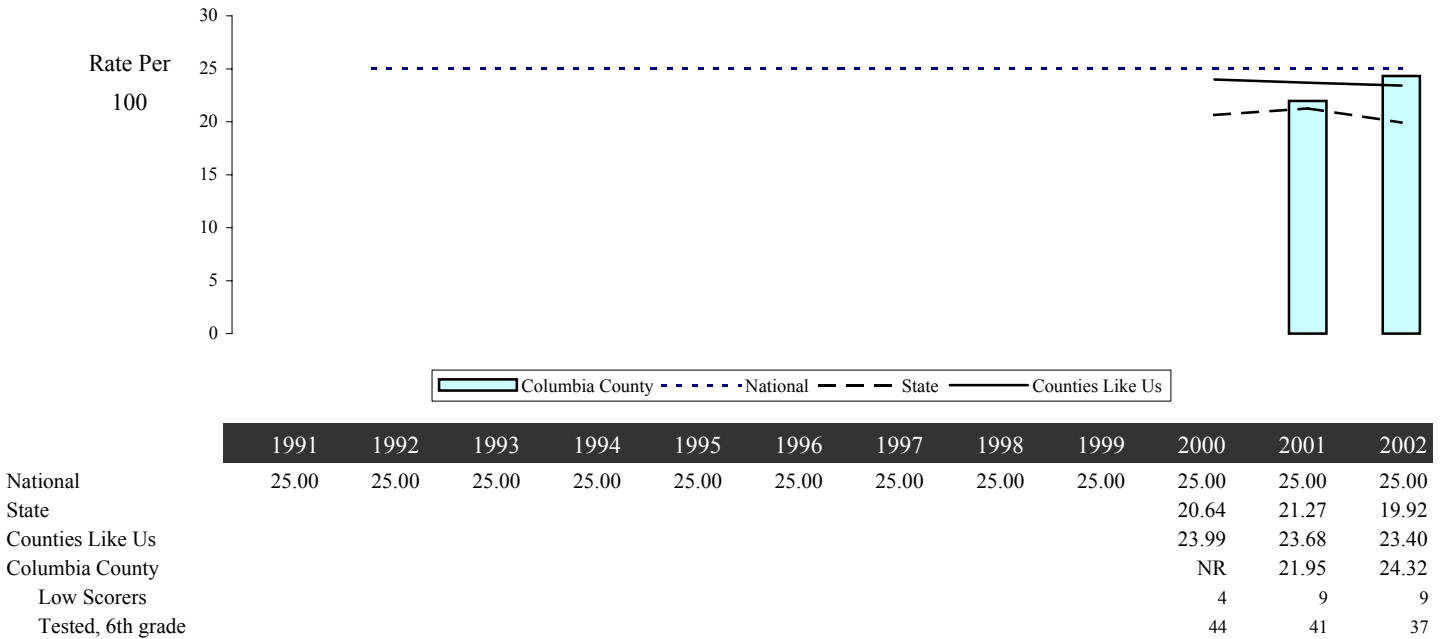

## Poor Academic Performance, Grade 4 Washington Assessment of Student Learning (WASL)

	1991	1992	1993	1994	1995	1996	1997	1998	1999	2000	2001	2002
National	Comparable National Data Not Available											
State								82.42	80.97	76.68	73.30	70.86
Counties Like Us								85.16	84.43	81.55	78.16	77.56
Columbia County								89.19	92.00	83.78	80.70	76.74
Low Scorers								66	46	31	46	33
Tested, 4th grade								74	50	37	57	43

**Note:** The State and County rates are the annual number of fourth graders who failed one or more content areas in the Washington Assessment of Student Learning (WASL). Tests are given in the spring of the year. Data for 2002 is for students in 4th grade during the school year 2001/2002. Previous reports used 1990 Census population distributions to allocate school district data to counties. Census population distributions for 2000 are now being used and event counts differ slightly in some counties.

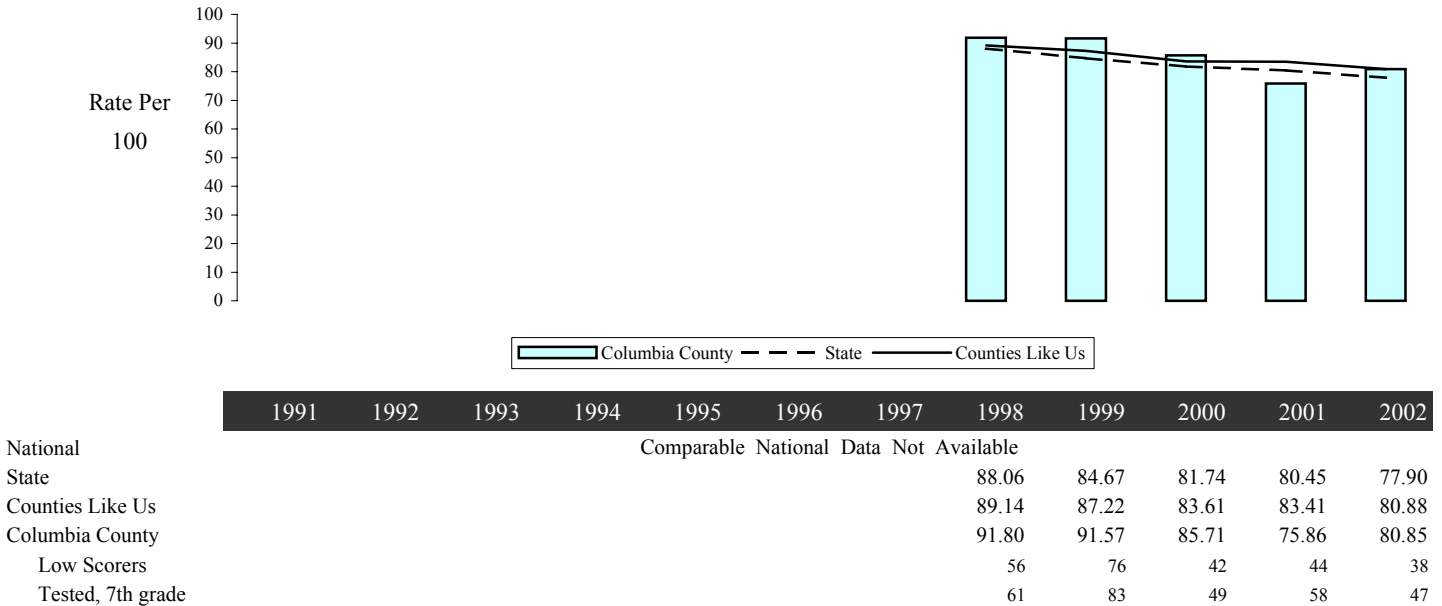

**State Source:** Office of Superintendent of Public Instruction, Instructional Programs, Curriculum and Assessment, Grade 4 Failing In One Or More Content Areas

**Poor Academic Performance, Grade 6 Comprehensive Tests of Basic Skills (Battery)**

**Note:** The State and County rates are the annual number of sixth graders whose Battery test score was below the threshold score for the low quartile of the national norm group, per 100 sixth graders who took the Battery test. The Battery test score is the average of the scores on the reading, language, and math portions of the Comprehensive Tests of Basic Skills. The Iowa Tests of Basic Skills (ITBS) at third and sixth grades, and the Iowa Tests of Educational Development (ITED) at ninth grade, comprise the norm-referenced component of the statewide testing program.

**State Source:** Office of Superintendent of Public Instruction, Instructional Programs(OSPI), Curriculum and Assessment, Grade 6 Low Quartile Test File

**National Source:** By definition the national low quartile is 25%. The exact score representing that quartile boundary is used by OSPI to calculate the number of students testing below that score in Washington State.

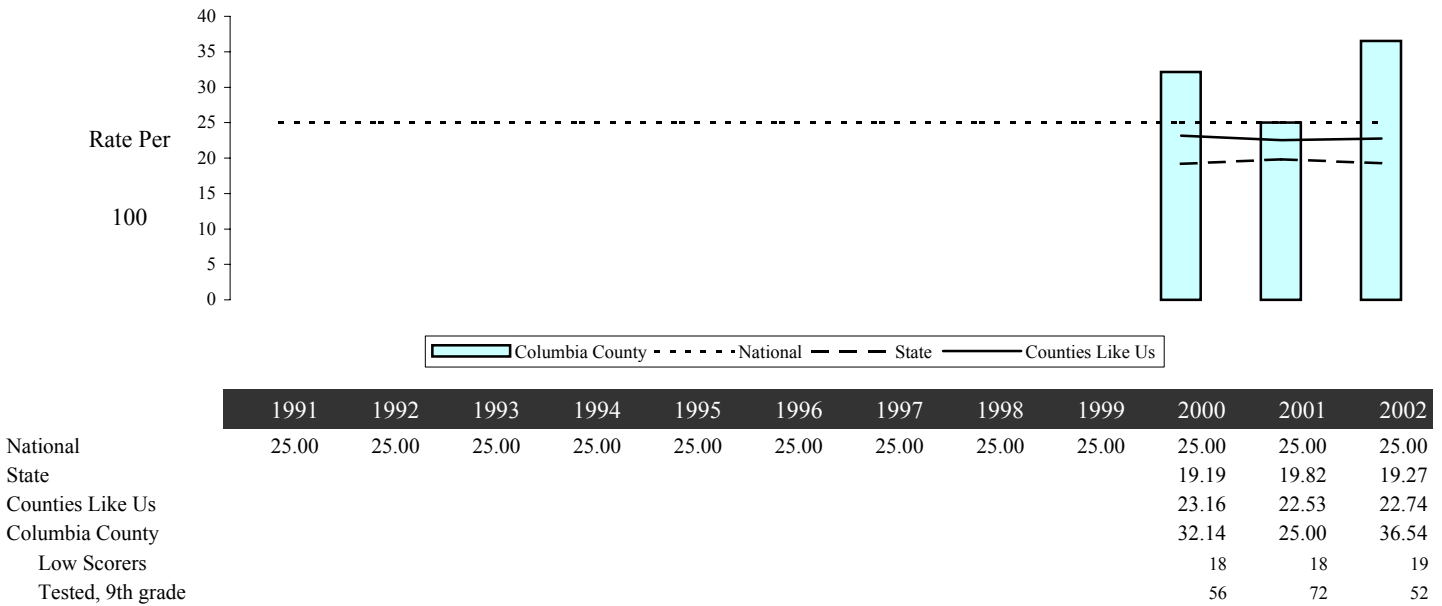

**Poor Academic Performance, Grade 7 Washington Assessment of Student Learning (WASL)**

**Note:** The State and County rates are the annual number of seventh graders who failed one or more content areas in the Washington Assessment of Student Learning (WASL). Tests are given in the spring of the year. Data for 2002 is for students in the 7th grade during the school year 2001/2002. Previous reports used 1990 Census population distributions to allocate school district data to counties. Census population distributions for 2000 are now being used and event counts differ slightly in some counties.

**State Source:** Office of Superintendent of Public Instruction, Instructional Programs, Curriculum and Assessment, Grade 7 Failing In One Or More Content Areas

## Factor: Low School Achievement

### Poor Academic Performance, Grade 9 Comprehensive Tests of Basic Skills (Battery)

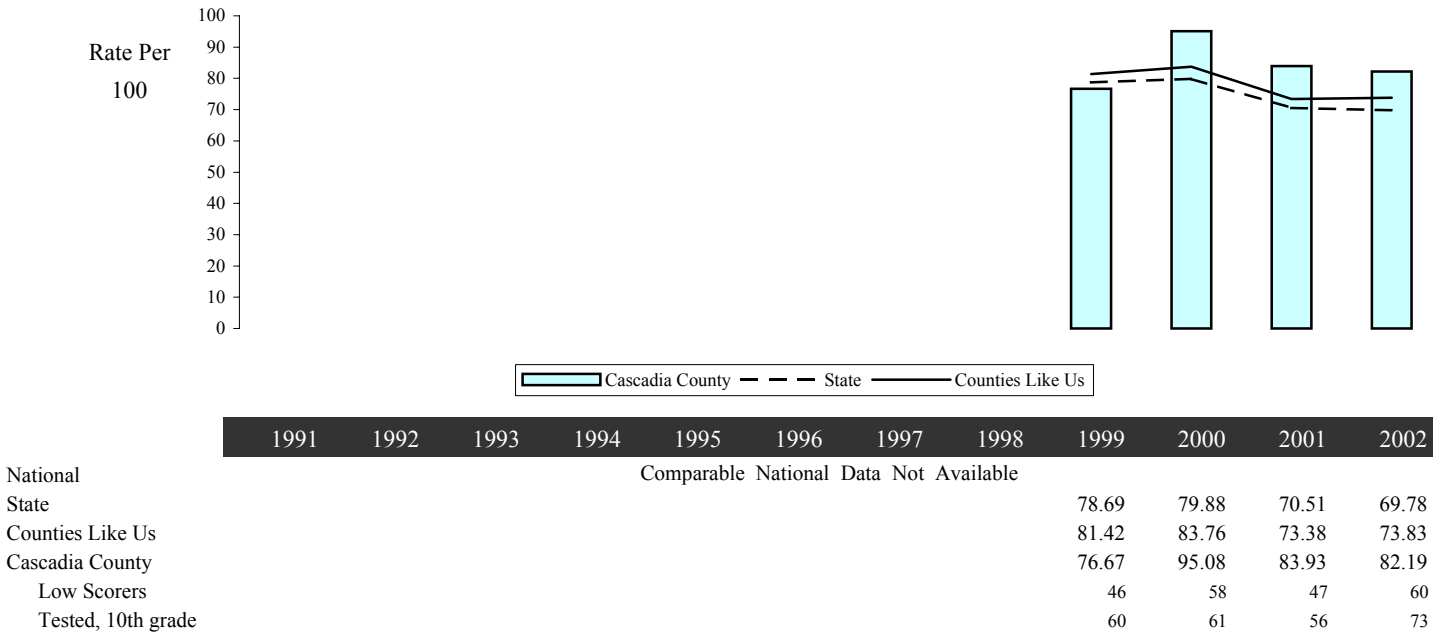

**Note:** The State and County rates are the annual number of ninth graders whose Battery test score was below the threshold score for the low quartile of the national norm group, per 100 ninth graders who took the Battery test. The Battery test score is the average of the scores on the reading, language, and math portions of the Comprehensive Tests of Basic Skills. The Iowa Tests of Basic Skills (ITBS) at third and sixth grades, and the Iowa Tests of Educational Development (ITED) at ninth grade, comprise the norm-referenced component of the statewide testing program.

**State Source:** Office of Superintendent of Public Instruction, Instructional Programs(OSPI), Curriculum and Assessment, Grade 9 Low Quartile Test File

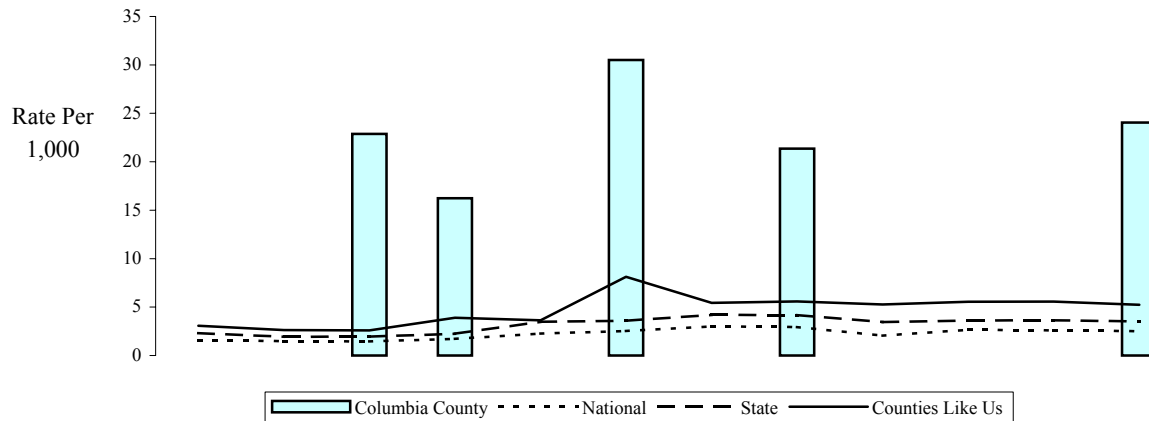

**National Source:** By definition the national low quartile is 25%. The exact score representing that quartile boundary is used by OSPI to calculate the number of students testing below that score in Washington State.

## Poor Academic Performance, Grade 10 Washington Assessment of Student Learning (WASL)

**Note:** The State and County rates are the annual number of tenth graders who failed one or more content areas in the Washington Assessment of Student Learning (WASL). Tests are given in the spring of the year. Data for 2002 is for students in the 10th grade during the school year 2001/2002. Previous reports used 1990 Census population distributions to allocate school district data to counties. Census population distributions for 2000 are now being used and event counts differ slightly in some counties.

**State Source:** Office of Superintendent of Public Instruction, Instructional Programs, Curriculum and Assessment, Grade 10 Failing In One Or More Content Areas

**Arrests (Age 10-14), Alcohol- or Drug-Related**

	1990	1991	1992	1993	1994	1995	1996	1997	1998	1999	2000	2001
National	1.59	1.48	1.46	1.71	2.26	2.52	3.01	2.94	2.04	2.66	2.60	2.51
State	2.32	1.93	1.95	2.24	3.49	3.59	4.19	4.18	3.46	3.62	3.63	3.52
Counties Like Us	3.07	2.62	2.59	3.89	3.63	8.13	5.44	5.58	5.27	5.55	5.56	5.24
Columbia County	NR	NR	22.88	16.23	NR	30.51	NR	21.35	NR	NR	NR	24.05
Arrests, 10-14	0	3	7	5	1	9	1	6	1	2	3	7
Adjst'd Pop 10-14	311	313	306	308	304	295	295	281	269	279	291	291

**Note:** The rates are the annual number of arrests of younger adolescents (age 10-14) for alcohol and drug law violations, per 1,000 children (age 10-14). Alcohol violations include all crimes involving driving under the influence, liquor law violations, and drunkenness. For children, arrests for liquor law violations are usually arrests for minor in possession. Drug law violations include all crimes involving sale, manufacturing, and possession of drugs.

1) Data may differ from our last report because of refinements to our population adjustment process. Denominators are adjusted by subtracting the population of police agencies that did not report arrests to Uniform Crime Report (UCR). In spite of this population adjustment, when the non-reporting police jurisdiction is where much of the crime occurs, the rate for the county will be lower than it would be if that jurisdiction was included. For percent subtracted and the agencies not reporting, see the appendix on Non-Reporting Agencies and Population.

2) The DUI portion of this measure is likely understated, because arrests made by the State Patrol (approximately 40% of DUI arrests) are not attributable to counties. State Patrol arrests are included in the state rates.

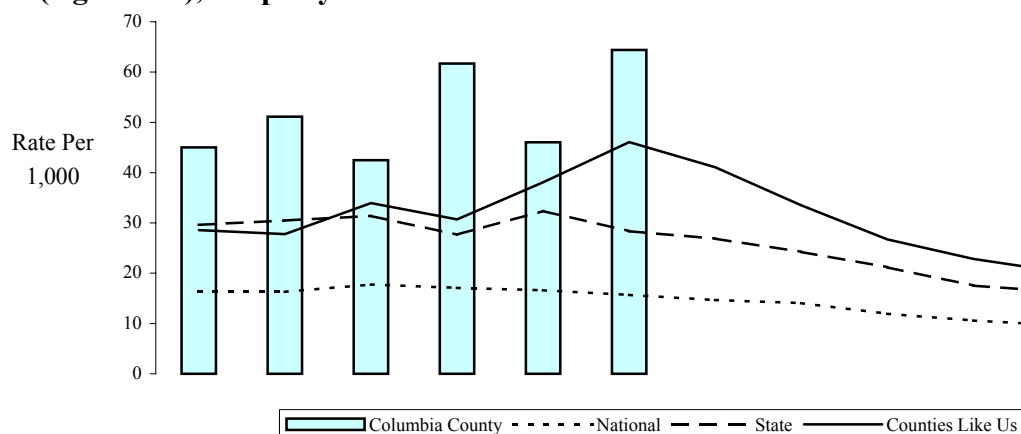

3) No rate is given when the numerator is less than 5.

Persons, 10-17		498	492	503	506	508	515	458	450	470	488	488

**Note:** The rates are the annual number of children (age 10-17) receiving state-funded alcohol or drug services, per 1,000 children 10-17. Counts of clients are unduplicated so that those receiving services more than once during the year are only counted once for that year. State-funded services include treatment, assessment, and detox. Persons in Department of Corrections treatment programs are not included. Updates have been done and result in some changes to 2000 data.

**State Source:** Department of Social and Health Services, Division of Alcohol and Substance Abuse, Treatment and Assessment Report Generation Tool (TARGET)

Arrests, 18+	45	100	110	71	38	45	66	32	47	76	57	86
Adjst'd Pop 18+	3,024	2,998	2,997	3,068	3,106	3,147	3,147	2,985	3,024	3,109	3,089	3,089

**Note:** The rates are the alcohol violations (age 18+), per 1,000 adults (age 18+). Alcohol violations include all crimes involving driving under the influence, liquor law violations, and drunkenness. DUI arrests by the Washington State Patrol (29% of all Adult Alcohol-related Arrests) are included in the state trend analysis. However, they are not included in the county rankings since WSP arrests are not assigned to counties. Data may differ from our last report because of refinements to our population adjustment process. Denominators are adjusted by subtracting the population of police agencies that did not report arrests to UCR. In spite of this population adjustment, when the non-reporting police jurisdiction is where much of the crime occurs, the rate for the county will be lower than it would be if that jurisdiction was included. For percent subtracted and the agencies not reporting, see the appendix on Non-Reporting Agencies and Population. No rate is given when the numerator is less than 5.

### Alcohol-Related Traffic Fatalities Per All Traffic Fatalities

**Note:** The rates are the annual number of alcohol-related traffic fatalities, per 100 traffic fatalities. "Alcohol-related" means that the officer on the scene determined that at least one driver involved in the accident "had been drinking." Thus, "Alcohol-related" includes but is not limited to the legal definition of driving under the influence.

**Arrests (Age 10-17), Alcohol Violation**

	1990	1991	1992	1993	1994	1995	1996	1997	1998	1999	2000	2001
National	7.41	6.41	5.24	4.88	5.12	5.12	6.58	6.53	6.73	6.66	6.14	5.36
State	11.11	8.62	7.20	7.54	8.06	7.83	9.65	9.39	9.28	9.56	9.02	8.22
Counties Like Us	14.99	15.17	13.09	15.61	15.87	16.23	16.41	17.41	18.52	19.80	17.67	16.36
Columbia County	35.86	96.39	91.46	31.81	51.38	57.09	13.59	28.38	40.00	70.21	18.44	57.38
Arrests, 10-17	18	48	45	16	26	29	7	13	18	33	9	28
Adjst'd Pop 10-17	502	498	492	503	506	508	515	458	450	470	488	488

**Note:** The rates are the annual number of arrests of adolescents (age 10-17) for alcohol violations, per 1,000 children (age 10-17). Alcohol violations include all crimes involving driving under the influence, liquor law violations, and drunkenness. For children, arrests for liquor law violations are usually arrests for minor in possession. 1) Data may differ from our last report because of refinements to our population adjustment process. Denominators are adjusted by subtracting the population of police agencies that did not report arrests to UCR. In spite of this population adjustment, when the non-reporting police jurisdiction is where much of the crime occurs, the rate for the county will be lower than it would be if that jurisdiction was included. For percent subtracted and the agencies not reporting, see the appendix on Non-Reporting Agencies and Population. 2) The DUI portion of this measure is likely understated, because arrests made by the State Patrol (approximately 40% of DUI arrests) are not attributable to counties. State Patrol arrests are included in the state rates. 3) No rate is given when the numerator is less than 5.

**Counting Alcohol- or Drug-related Deaths**

**Counties Like Us**

**Duplicated and Unduplicated Counts**

**Rates – Why is Raw Data Converted to Rates?**

**Uniform Crime Report - Non-Reporting Police Jurisdictions**

**Quarterly Date Update Schedule**

**Counting Alcohol- or Drug-related Deaths**

Alcohol- or drug-related deaths are identified by matching the underlying cause of death from death certificate records to a list of causes that are considered AOD-related. The deaths identified as AOD-related then may be summed to provide county and state totals. Dividing the total AOD-related deaths by all deaths in a county or state gives the percent of all deaths that are alcohol and drug related. Lists of underlying causes of death that are AOD-related have been developed in several studies (see first three in list below). AOD-related deaths used in this report are determined using a comprehensive assembly of disease, accident, and injury codes identified in those studies. The codes are based upon the International Classification of Diseases, Ninth Revision (ICD-9) from 1990 to 1998 or International Classification of Diseases, Tenth Revision (ICD-10) after 1998 .

The identified AOD-related causes of death may be either fully attributable or sometimes attributable to alcohol or drugs. Some underlying causes of death are explicit in their mention of alcohol or drugs. Examples include alcoholic cirrhosis of the liver (ICD-9 code 571.2), alcohol and drug dependence syndromes (ICD-9 codes 303 and 304, respectively), and drug poisonings (ICD-9 codes E850 through E859). All deaths of this sort are fully, or 100%, attributable to alcohol or drug abuse and are considered direct AOD-related deaths.

Other underlying causes of death are related only sometimes to alcohol or drugs. For example, epidemiological studies have shown that, among persons over 35 years of age, 60% of deaths due to chronic pancreatitis (ICD-9 code 577.1) and 75% of malignant neoplasms of the esophagus (ICD-9 code 150) are alcohol-related. For persons of all ages, 42% of motor vehicle traffic and nontraffic deaths (ICD-9 codes E810 through E825) are alcohol-related. The appropriate percentage of such indirectly attributable deaths are also counted toward totals for AOD-related deaths.

The table on the following page characterizes the different diseases, injuries, and accidents by: name, ICD-9 or ICD-10 code, percent attributable to alcohol or drugs, age of inclusion. Information sources are listed below.

## Counties Like Us

Knowing that your county has a particular rate for one of the indicators---say, number of tobacco sales licenses---does not help you evaluate the importance of that indicator to your risk profile. You do not know if it is higher or lower than you could reasonably expect. It is more useful to compare your county rate to the state rate, which is the average for the whole state, and to other counties, especially counties that have some characteristics in common with your county. This is especially important when urban rates differ substantially from rural rates. The comparison we present is for a group of counties that are similar in characteristics related to prevention planning: population of young people (aged 10-24), the percentage of deaths in the county that are alcohol and drug-related, and a simple geographic division into Eastern and Western Washington. For each indicator the Counties Like Us rate is the average rate across all of the counties in the cluster.

The groupings for “Counties Like Us” are as follows:

Urban A\* – King County

Urban B\* – Pierce, Snohomish, and Spokane

Urban C – Benton, Clark, Kitsap, Thurston, Whatcom, and Yakima

Rural A – Ferry, Franklin, Grant, Klickitat, Okanogan, Pend Oreille, and Skamania

Rural B – Adams, Asotin, Chelan, Columbia, Douglas, Garfield, Kittitas, Lincoln, Stevens, Walla, and Whitman

Rural C – Clallam, Cowlitz, Grays Harbor, Island, Jefferson, Lewis, Mason, Pacific, San Juan, Skagit, Wahkiakum

\* For comparison, King County is compared to Urban B, but average scores for the indicators in Urban B do not include King County.

## Duplicated and Unduplicated Counts

In an unduplicated person count, each person is counted only once in a year for the specified activity or service type, even if they receive that service multiple times during the year. Examples include Temporary Assistance to Needy Families (TANF) Child Recipients, Food Stamp Recipients, and alcohol or drug treatment. Duplicated counts are made of events such as prison admissions, arrests, births, or admission to a hospital for attempted suicide. For instance, each time a person is admitted to a prison, that “event” is counted. Therefore, a person admitted more than once is included more than once in the total count.

## Rates: why is “raw data” converted to rates?

In order to make comparisons between counties and the state, and between counties that have different sizes, we use rates to describe an event in terms of a standard size population---either per 100 (percent), per 1,000 or per 100,000. For instance, what does it mean if County A has 42 alcohol retail licenses, and County B has 399? Does it mean that based on this indicator, the risk factor (Availability) is much higher in County B than it is County A? No, not if County B is a much bigger county. If County B is bigger, then the “rate” of liquor licenses per population might be the same or even lower. The only way to compare them is to convert the raw numbers to rates, based on the same population factor.

For instance:

County A: # of licenses – 42, # of persons (all ages) – 14, 297

County B: # of licenses – 399, # of persons (all ages) – 186,185

To calculate the rate per 1,000:

$42 / 14,297 = .002937$   $.002937 \times 1,000 = 2.94$

$399 / 186,185 = .002143$   $.002143 \times 1,000 = 2.14$

So the rate of alcohol retail licenses is 2.94 per 1,000 people in County A, and 2.14 per 1,000 people in County B.

### **Uniform Crime Report - Non-Reporting Police Jurisdictions**

Most law enforcement agencies report arrest and offence data to the Washington Association of Sheriffs and Police Chiefs (WASPC), which in turn provides data to the FBI's Uniform Crime Reporting Program. This is the source of our data. Some jurisdictions do not report all arrests and offences, some report partial years, and some withhold certain categories of arrests or offences. Reporting is voluntary for arrests and mandated for offences. Some data is reported on UCR in a new system which is not yet compatible with output reports and cannot be extracted for this report.

The information in the following two sections, Non-reporting Population and Non-reporting Agency, show how and when your counties police jurisdictions reported data to the Washington Association of Sheriff's and Police Chiefs. If your county is one with a significant amount of incomplete data, be very careful that you adjust your risk assessment to reflect this. In other words, the reported arrest rates may not adequately reflect the entire county. This will be true especially in those cases where the non-reporting police jurisdictions have either very high or very low arrest rates, compared to the rest of the county.

In order to compensate for missing police reports, we have adjusted the denominator in the rate calculation so that it reflects only the proportion of the county for which we do have data. For instance, say County A, with a population of 40,000, has eight police districts. Now, if one of the police districts in the county did not report their arrests, the number of arrests would not be representative of the whole county. Therefore, we would not want to use the population of the whole county in the denominator because that would make the rate lower than it should be. The solution used in this report is to subtract the population of that missing police district from the county population. We follow the same procedure for police districts that report partial years: if they report only six months, we use only half of the population to calculate the rate.

Due to the uneven geographic distribution of crime, missing police data can cause spikes or dips in the trend data comparison of multiple consecutive years. We do not run into this problem in the state report because there (as opposed to the individual county reports) we are only reporting 5-year averages. Most adjustments for non-reporting population are then smoothed out at the county level.

## Quarterly Data Update Schedule

Domain	Factor	Indicator	Update Quarter
Community	Availability of Drugs	Alcohol Retail Licenses	1
		Tobacco Retail And Vending Machine Licenses	4
Community	Extreme Economic & Social Deprivation	Temporary Assistance to Needy Families (TANF), Child Recipients	3
		Food Stamp Recipients (All Ages)	3
		Free And Reduced Lunch (Students Approved)	3
		Low Birthweight Babies	3
		Unemployed Persons (Age 16+)	2
Community	Low Neighborhood Attachment	Population Not Registered to Vote	1
		Registered And Not Voting In The November Election	1
		Prisoners in State Correctional Systems (Age 18+)	2
Community	Transitions & Mobility	Existing Home Sales	2
		Net Migration, 3 Year Moving Average	4
		New Residence Construction	2
Individual/ Peer	Early Initiation of Problem Behavior	Arrests (Age 10-14), Alcohol- or Drug-Related	3
		Arrests (Age 10-14), Property Crime	3
		Arrests (Age 10-14), Vandalism	3
Family	Family Conflict	Divorce	3
		Arrests, Domestic Violence	1
		Offences, Domestic Violence	3
Family	Family History of Substance Abuse	Clients Of State-Funded Alcohol or Drug Services (Age 18+)	3
		Alcohol- Or Drug-Related Deaths	3
Family	Family Management Problems	Foster Care On-going Placements, Duplicated Child Counts (Birth-17)	2
		Victims Of Child Abuse And Neglect In Accepted Referrals	1
School	Low Commitment to School	High School Dropouts	3
School	Low School Achievement	Poor Academic Performance, Grade 3 Comprehensive Tests of Basic Skills (Battery)	3
		Poor Academic Performance, Grade 4 Washington Assessment of Student Learning (WASL)	3
		Poor Academic Performance, Grade 6 Comprehensive Tests of Basic Skills (Battery)	3
		Poor Academic Performance, Grade 7 Washington Assessment of Student Learning (WASL)	3
		Poor Academic Performance, Grade 9 Comprehensive Tests of Basic Skills (Battery)	3
		Poor Academic Performance, Grade 10 Washington Assessment of Student Learning (WASL)	3

Technical Notes

Domain	Factor	Indicator	Update Quarter
Other	Non-Violent Crime	Arrests (Age 18+), Property Crime	3
		Arrests (Age 10-17), Curfew, Loitering, Vandalism And Disorderly Conduct	3
		Arrests (Age 10-17), Property Crime	3
Other	Violent Crime	Arrests (Age 18+), Violent Crime	3
		Arrests (Age 10-17), Violent Crime	3
Other	Substance Use	Clients Of State-Funded Alcohol or Drug Services (Age 10-17)	3
		Arrests (Age 18+), Alcohol-Related	3
		Arrests (Age 18+), Drug Law Violation	3
		Arrests (Age 18+), Drunk Driving	3
		Alcohol-Related Traffic Fatalities Per All Traffic Fatalities	3
		Arrests (Age 10-17), Alcohol Violation	3
		Arrests (Age 10-17), Drug Law Violation	3
Other	Adolescent Sexual Behavior	Sexually Transmitted Disease Cases (Birth 19)	4
		Births (Mothers Age 10-17)	3
Other	Suicide	Suicide and Suicide Attempts (Age 10-17)	4

## Non-Reporting Population

### Columbia County

#### Populations subtracted for police agencies not reporting

Police agencies are not required to report arrests or offences to UCR, they do so voluntarily. For a variety of reasons, a jurisdiction may report part or none of the arrests or offences for a year. In these cases, the denominator is the population of the areas that did report. For example, if juvenile arrests for one agency are not reported, the juveniles for that jurisdiction are not included in the denominator either.

The tables below show the values that comprise the adjustment for your county for each age range we report. "% Subtracted" is the percent of the county's population subtracted for non-reporting. "Subtracted" is the amount subtracted. "Persons" is the county population. "Adjst'd Pop" is the denominator used to calculate indicator rates.

Nevertheless, rates can differ markedly from year to year particularly if a jurisdiction, where most of the crime in the county occurs, did not report. Jurisdictions crossing county lines are apportioned to each county by age, and sex of the population. This may result in very small population adjustments in one county and the larger amount in another.

All **Arrests** for 10-14 year olds have 5 year rates which represent **100.00 %** of the population.  
Adjustments for non-reporting Arrests (age 10-14)

	1991	1992	1993	1994	1995	1996	1997	1998	1999	2000	2001
% Subtracted	NR	NR	NR	NR	NR	NR	NR	NR	NR	NR	NR

Adjst'd Pop 18+	#VALUE!	#VALUE!	#VALUE!	#VALUE!	#VALUE!	4,202	3,990	4,020	4,166	4,062	4,062

### Non-Reporting Agencies

## Columbia County

### Police Agencies that did not report arrests to UCR

Police agencies with some or all of their arrests being reported in your county are listed below. The table shows reporting patterns for each year 1991-2001. Agencies that did not report arrests, or reported juvenile or adult arrests for only a part of the year, are indicated. If a jurisdiction extends into more than one county, arrests are apportioned to each county.

Key: #A Number of months no arrests for adults were reported to UCR.

**#J** Number of months no arrests for juveniles were reported to UCR.

*X Did not report arrests to UCR.*

[illegible]
